Alcohol Explained is not a doctrine you have to follow or a set of steps or instructions you need to accept and work through. It is not a personal testimony designed to inspire you to a life of sobriety. It is simply information.

### **About Alcohol Explained-Archive | Alcohol Explained**

William Porter, author of Alcohol Explained, dives deep into how alcohol works in the body. He answers why alcohol is both a depressant and a stimulant? Why does alcohol help you fall asleep but leave you awake at 3am? Why is it that alcohol can feel so good (euphoria) and then later feel so bad (anxiety, hangovers)?

## **William Porter | Alcohol Explained**

Blood Alcohol Concentration (BAC) refers to the percent of alcohol (ethyl alcohol or ethanol) in a person's blood stream. A BAC of .10% means that an individual's blood supply contains one part alcohol for every 1000 parts blood. In California, a person is legally intoxicated if he/she has a BAC of .08% or higher. Factors that impact BAC

## **Alcohol Explained by William Porter | Audiobook | Audible.com**

The only book on alcohol cessation I brought with me was Alcohol Explained. After 3-hour morning hikes, I would read in the afternoon and think in the evenings. Porter's post-alcohol sleep predictions were spot on. The first couple of nights were rough. I read the book twice on my mini sabbatical and didn't touch alcohol.
