Cognitive linguistics is an interdisciplinary approach to the study of language, mind, and sociocultural experience that first emerged in the 1970s. Cognitive linguistics is characterized by a commitment to the inseparability of meaning and form in the study of language. It also takes the view that language reflects general aspects of cognition rather than adopting a modular view of mind.

Language and cultural theory, as developed in pre-cognitive linguistics and anthropology, has a long tradition, beginning with Wilhelm von Humboldt and drastically reshaped by Ferdinand de Saussure. Humboldt argues that the relationship between thought and language is bidirectional rather than unidirectional and assumes mutual correspondences between culture and language.
