Electric utilities and independent power : impact of ...

An independent power producer or non-utility generator is an entity that is not a public utility but owns facilities to generate electric power for sale to utilities and end users. NUGs may be privately held facilities, corporations, cooperatives such as rural solar or wind energy producers, and non-energy industrial concerns capable of feeding excess energy into the system. An independent water and power producer is similar to an IPP, but with a unified process to also output usable treated water

Compare Gas and Electricity suppliers - Which? Switch

Independent power producers (IPPs) are companies which produce electricity for sale to public utilities. An IPP is not a public utility, instead focusing on the generation of electricity, not the transmission of it. Some may sell to end users, depending on the energy policies and industry norms in the areas where they operate.
