The LEED Reference Guide for Building Design and Construction, 2013 Edition, has been made possible only through the efforts of many dedicated volunteers, staff members, and others in the USGBC community. The Reference Guide drafting was managed and implemented by USGBC staff and consultants and included review and suggestions by many Technical Advisory Group (TAG) members.

~~LEED Reference Guide |~~ ~~BuildingGreen~~

For the LEED AP Exam, you'll need to memorize ALL of the referenced standards mentioned in the reference guide. Some LEED credits don't reference any standards while others can reference quite a few. The most common LEED standard is the ASHRAE standard. Learn it, love it, take it out for a romantic Valentine's Day dinner, sleep with it, get in fights with it and then apologize – even ...

The guide is an excellent reference for the green building community and LEED certification requirements and I would recommend it for any student or professional either looking for a green building reference book or looking to take the LEED exam.

~~Green Building Design and Construction: U.S. Green ...~~

How LEED green building certification is organized. Since it's establishment in 2001, USGBC evolved the original LEED reference guide (BD+C) into a family of rating systems (NC, CI, EB) that address specific building use types. Today, multiple LEED rating systems establish specific framework and performance metrics by building type.

~~Certification & Credentials ...~~

In studying for the LEED-AP exam, the best advice I received was to read the U.S. Green Building Council's LEED for New Construction Reference Guide version 2.2 -- and read it again, and memorize as much specific credit by credit information as possible. Since passing the exam, that's become the advice I give most often.

~~Why doesn't USGBC sell a PDF of the LEED Reference Guide ...~~

This ANSI Standard Guide, derived from The Integrative Design Guide to Green Buildings: Redefining the Practice of Sustainability by 7group and Bill Reed, serves as the referenced standard for the new LEED v4 IP credit. Systems are voluntary, consensus-based, and market-driven. Based on existing and proven technology, they evaluate environmental performance from a whole building perspective over a building's life cycle, providing a definitive standard for what constitutes a green building in design, construction, and operation.
