In *Nonzero: The Logic of Human Destiny*, science writer Robert Wright argues that cultural evolution leads mankind to higher and higher levels of complexity, just as biological evolution does. Complexity is defined as, or perhaps attained through, an accumulation of situations in which cooperation produces gains for all parties involved, as in the positive-sum outcomes of what game theorists call “ non-zero-sum games. ”

In *Nonzero: The Logic of Human Destiny*, Robert Wright argues that gains from trade, or “ nonzero ” transactions, is the motivating force driving human history. Because of the advantages of engaging in nonzero-sum transactions, it was virtually inevitable that living organisms would evolve whose primary function would be to capitalize on the benefits of nonzero trading opportunities.

But yeah, the book is about Christian universalism—about not only its history, but its logic. Principally, it's a philosophical argument that's negative in form. I'm afraid I don't know that it brings good news, but the claim it does make is that the only way [classical Christian claims] can be coherent is in the form of one of the classical universalist construals.
