Simulation Learning System (SLS) Training. Simulation Learning System (SLS) is a realistic patient simulation experience, with guided discussion questions to help your students through the scenarios. Students also use SimChart® for Nursing, a robust Electronic Health Record system, that houses the patient records for scenarios and skills drills. This page features online tutorials, guides, and training sessions developed by product trainers and nurse educators, allowing you to learn this ...

Simulation Learning System (SLS) - Elsevier Education

Elsevier's simulation solutions offer realistic, hands-on experience in a controlled and monitored environment. These products are designed to help build critical thinking and clinical reasoning skills and give students the confidence and clinical competence they need to succeed in professional practice. According to research conducted by the National Council of State Boards of Nursing, the use of simulation for up to 50% of the clinical experience is an effective strategy for preparing ...
