Online Library Study Guide Fossils Answers For Earth Science

Earth History: Recognize and explain that fossils found in layers of sedimentary rock provide evidence of changing life forms. Recognize how different types of fossils are formed, such as petrified remains, imprints, molds and casts.

~~Fossils. 8th Grade Science Worksheets and Answer key ...~~

Ancient life forms have been preserved, in part and in whole, in the rock record. These preserved pieces of ancient life forms are called fossils. Fossils found in limestone are usually formed by a process called cast and mold. Petrified wood is formed by a process called petrification. In very hot, arid environments, flesh can be dried out and preserved indefinitely.
