Preparing the Area - Shading takes place after outlining, and it is recommended to clean the entire area of the tattoo with soap and water. This helps to get rid of excess ink left by the lining process, as well as to get off any stencil marks or sticky residue that have been left behind so you can make sure your line work is solid before starting to shade.

Tattoo Shading | Tattooing 101

To shade a tattoo, start by applying a thin layer of Vaseline to the area you want to shade in order to lubricate and protect the skin. Next, turn on the tattoo machine and set it to a low speed for better control. Then, start with the needle in the center of the area you want to shade and work your way outward to the edges in a circular motion.

Color Packing Tattoo Shading TIPS - YouTube

Tattoos are ruined by running the color over the outline. By continually wiping away all the excess color, strict attention can be paid to what one is doing and where one is going. When inspecting work in progress, the skin must be stretched tight (as if tattooing) so any mistakes will be readily picked up.

Chapter Seventeen Coloring - Successful Tattooing - Tattoo -

Realism tattoos need to be at least three inches high for the main object so you will have plenty of room to apply the detail. The rule of thumb with a persons portrait is that the three inches should be measured from the chin to the begging in of the hair line.
